Easy Access to Your Company Resource
Anytime, Anywhere

INNOWAVE.COM.SG

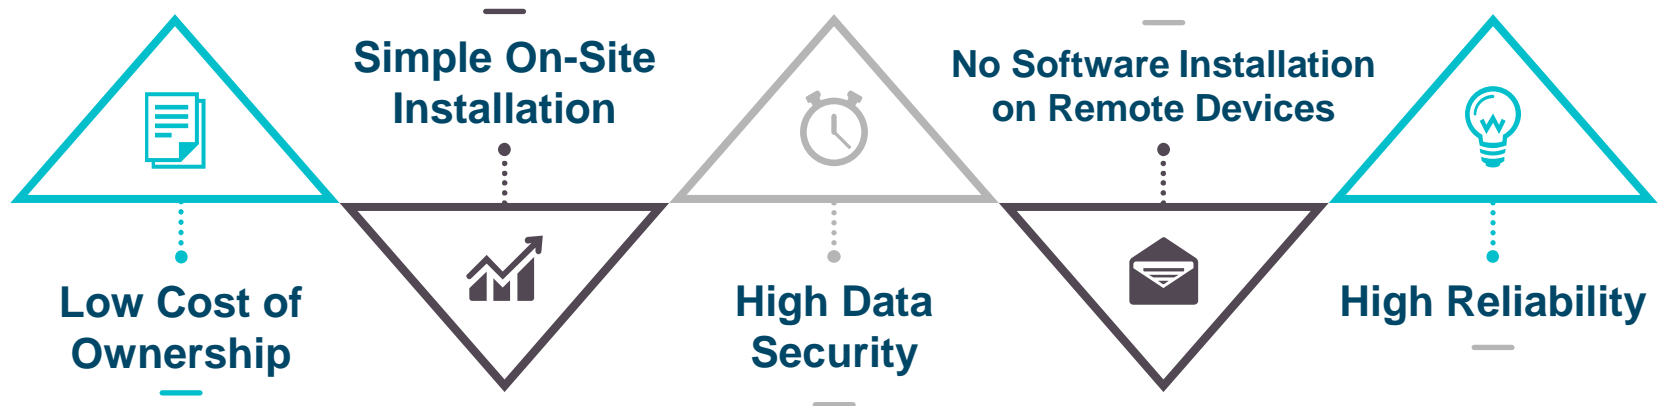

Virtualized Resources

Easy Access to Your Company Resource. Anytime, Anywhere.

- Simple and secured data management
- No software installations required for company servers or remote devices
- Suitable for small and medium enterprises to achieve rapid deployment of enterprise solutions and desktop applications through our remote cloud management platform

Key Features

- Save money and maintenance costs by moving to cloud-based services instead of investing in standard desktop services
- Allow remote access to enterprise data and services, but restricted to localized data compute and storage
- High system availability
- Long Mean-Time-Between-Failure

System Capacity

- Simple installation of local server with cloud management software which can support more than 64 concurrent remote access clients
- Local server stores up to 500GB of data which includes operation logs and alert personnel of suspicious activity

Reliability

- System availability exceeds 99.99%
- System mean time between failures is 35,000 hours

System Overview
